Scan with your phone camera to view a video to learn more about In-Home Therapy:

What is In Home Therapy (IHT)?

IHT is designed to help families with children ages 3-21 that have severe behavioral and emotional challenges. An experienced therapist and team member will meet with you 2-3 times a week to create a plan to address current problems and help accomplish your goals.

How can we help families?

Develop routine & structure

Improve listening & communication

Advocate for necessary resources

Work with your child's school

Teach children better ways to manage feelings

Develop strategies to reduce emotional outbursts
